**FINE MILLED MINERAL FERTILISERS
& SOIL AMMENDMENTS**

PRESCRIPTION BLENDS

RATES FROM 50 KG/HA +

SUPER-FINE PARTICLES

HIGHLY SOLUBLE & REACTIVE

One-Cal Groundspread Products

- ✓ Tailored blends for each application.
- ✓ Blends available for all soil types (acid, neutral and alkaline).
- ✓ Controlled moisture content to maximise spreading performance & minimise dust losses.
- ✓ Trace elements and pasture seed can be added.
- ✓ A single pass application that is prescribed to give **3 benefits**:
 - Plant nutrition
 - Improve soil structure
 - Improve soil pH
- ✓ Easy to handle and cost effective.

One-Cal Core Ingredients

Phosphate Rock	9.5% P, 22% Ca	NV-59
Limestone	38% Ca	NV-98
Gypsum	22% Ca, 18% S	
Elemental Sulphur	100% S	
Magnesium Carbonate	25% Mg	NV-110

Other Elements: Potassium, Nitrogen, Zinc, Iron, Manganese, Copper, Cobalt, Molybdenum, and Boron.

One-Cal

One-Cal Compost

- ✓ Straw & manure based compost that handles and spreads well.
- ✓ Very high in organic carbon
- ✓ A well balanced pasterised high performance compost

Typical Analysis

Organic Carbon	29 %	Cobalt	2.3 ppm
Nitrogen	2.5 %	Boron	25 ppm
Phosphorous	1.25 %	Iron	5580 ppm
Potassium	1.3 %	Manganese	430 ppm
Sulphur	2.9 %	Zinc	300 ppm
Calcium	6.1 %	Copper	90 ppm
		Molybdenum	6.5 ppm

One-Cal Aerial Products

- ✓ Tailored blends for each application.
- ✓ Blends available for all soil types (acid, neutral and alkaline).
- ✓ Best possible coverage - NO dust losses and suited to rugged terrain.
- ✓ Fine milled powders mixed with water on-farm.
- ✓ Minimised leaching and controlled solubility.
- ✓ Trace elements and seed can be added to the suspension as required.

www.swep.com.au

- Soilutions use SWEP Analytical Laboratories for all soil and tissue testing.
- SWEP is a 3rd Party family owned and operated company that has been trading for 33 years.
- SWEP are accredited to the Australasian Soil and Plant Analysis Council (ASPAC) and are also an accredited AQIS Quarantine site for the purposes of testing samples from anywhere in the world.
- SWEP tests are independent, cost effective and have a fast turn-around.

www.regyp.com.au

Soilutions are a **preferred distribution agent** for the full range of ReGyp products.

- ReGyp's key product is the industry leading **SuperAg Gypsum**.
- **SuperAg** is a high analysis product that offers greater spreading performance than comparable mined sources.
- **SuperAg's** market leading solubility ensures your **Canola** crop can access sulphur when it needs it.

Typical Analysis

Sulphur	17+ %
Calcium	23+ %
Gypsum	90+ %
Organics	1.5 % Max
